California Voter Registration System Changes Hands

Runbeck Election Services acquires the Voter Registration System DIMS.net

Phoenix, Arizona, June 25, 2019 —Runbeck Election Services has purchased the California portion of Data Information Management System (DIMS) voter registration system from Election Systems & Software. With nearly 50 years in the election industry providing software, equipment and ballot printing solutions, the acquisition was a natural fit. The knowledgeable staff from DIMS will join forces with Runbeck bringing an in-depth understanding of the integration between the DIMS Voter Registration System used by counties and VoteCal, the statewide database. Currently, DIMS is used by 15 counties in California to process almost 10 million voter registrations and to manage a variety of election procedures. Runbeck is committed to work closely with the Secretary of State and each California county throughout all future election processes.

“We are excited about adding this election management software company to our existing line of products and services. By incorporating the highly-skilled DIMS team, we are strengthening our position to offer unprecedented levels of customer support”, shares Jeff Ellington, Runbeck’s President/COO. “We now have more ways to serve our county and state partners. Ultimately, working together with DIMS will ensure that every voter is valued—it’s defending Democracy at the ground level.”

Runbeck Election Services produces successful elections and delivers customized solutions for 24+ million voters nationwide. We’ve developed cutting-edge equipment, software and production methods drawing from nearly five decades of election experience. Operations are completed at our state-of-the-art, environmentally-friendly secure facility. Our solutions include: Election Printing & Mailing, Ballot Printing On-Demand, Ballot Sorting Equipment, Ballot Software, Petition Management and Cybersecurity. We are America’s Election Partner.
