

VOCEM[®] PETITION MANAGEMENT SOFTWARE

Expedite Petition Processing — Save Time and Resources

One of the more tedious, time-consuming and costly tasks that election officials must perform is the processing of petitions. The manual processes of counting pages to the verification of names and signatures must be completed within a strict timeframe. It often requires the additional cost of hiring inexperienced temporary staffing.

Solution: Use Vocem Petition Management Software for page, name and address recognition. Vocem streamlines the petition process by providing automated counting and verification while providing full audibility. The easy-to-use software integrates with the Voter Registration (VR) database and uploads petition information into the VR database. Vocem produces full audit trails and expedited reports, so time saved is now directed to focus on elections.

VOCEM WORK?
VIEW THE
3 PHASES**

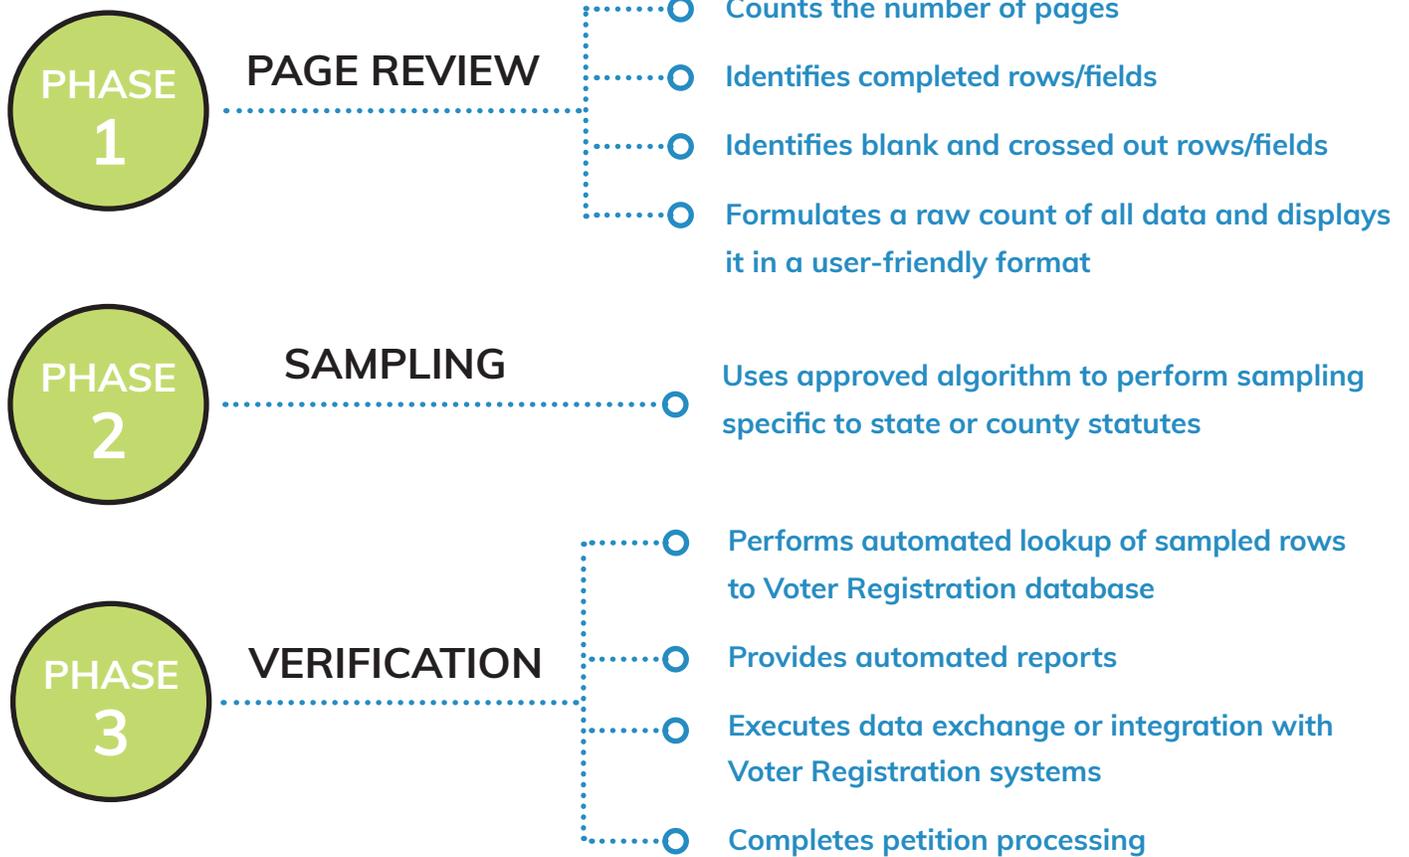

VOCEM BENEFITS

- ✓ Reduces the need for additional staffing
- ✓ No handling physical pages after scanning reducing risk of lost documents
- ✓ Automated name and address comparison
- ✓ Automated row counting
- ✓ Full audit history of all users—digital chain of custody
- ✓ No need for additional space—only network connectivity
- ✓ Automated reports, receipts, notices
- ✓ Reduces petition processing time
- ✓ Real time petition processing data
- ✓ Duplicates signature checking
- ✓ Voter Registration integration
- ✓ Easy workflow management
- ✓ Reports are displayed on-screen
- ✓ Reports are exported in various file formats

VOCEM PETITION MANAGEMENT SOFTWARE

works in 3 Phases

After the petitions are scanned, the Vocem processes begin:

Sampling
