

Secure, sturdy and mobile voting booth Hubs

STOP Complicated. GO Simple and Secure. VOTE CENTER HUBS.

Setting up and taking down your Voting Center locations takes a massive amount of time, manpower and resources. Runbeck provides a solution to assemble and store your election equipment in Vote Center Hubs for 1 to 4 voters in large arenas or compact office space. Vote Center Hubs, manufactured by FlexMet, safely house equipment and supplies year-round.

Set up your voting equipment in a sturdy Hub to provide a separate place for each voter. The design is configured specifically for major tabulation vendors' equipment.

Protect your valuable voting equipment! Hub models include 2 points of security: keylocks and a security seal space.

The Hubs are manufactured with durable powder-coated steel and sturdy locking caster wheels. Get stability and mobility.
